Lower risk ← → Higher risk

Potentially lower reward — Potentially higher reward

1	2	3	4	5	**6**	7

- Historical data may not be a reliable indication for the future.
- The Risk and Reward profile is not guaranteed and may change over time.
- The lowest category does not mean 'risk free'.
- The Fund is in category 6 (denoting high risk, but with the potential for better reward) due to the implementation of its investment policy and process and this rating is not a measure of the risk of capital loss but a measure of the Fund's price movement over time.

The indicator opposite does not take account of the following risks of investing in the Fund:

- Investing overseas can bring additional returns and spread risk to different markets. There are risks, however, that changes in currency rates may reduce the value of your investment.
- General Investment and Market Risks of the CIS: The Fund's activities may be significantly and adversely affected by general economic and market conditions, such as interest rates, availability of credit, inflation rates, economic uncertainty, changes in laws, and national and international political circumstances. These factors may affect the level and volatility of the CIS and the liquidity of the Fund's investments. Unexpected volatility or illiquidity could impair the Fund's returns or result in losses.
- Currency Risk: There is a risk of loss arising from exchange rate fluctuations or exchange control regulations.
- Use of derivatives for currency hedging purposes involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other investment.

For a complete description of such risk factors, please see the section entitled "Risk Factors" in the Company's prospectus which is available on www.davy.ie.
